Functional Requirements Homework 1 - Departments

1. Load a .csv archive of choice from the user's file system.
2. Register the municipalities and departments, based on the loaded .csv archive.
3. Show a table containing all the information registered. This information is: Department code, department name, municipality code, municipality name.
4. Filter the table with the use of an alphabetical choice box, showing the municipalities of the department which begins with the letter picked in the choice box.
5. Generate a pie chart with all the departments with their respective municipalities number.
